Function Tables

There were half as many chipmunks in the yard as there were squirrels.

Complete the table to show how the number of chipmunks, c, depends on the number of squirrels, s.

Equation: $c = s \div 2$

s	c
10	5
14	
18	
22	
26	

The store sold five pencils to each student, and ten pencils to the teacher.

Complete the table to show how the number of pencils sold, p, depends on the number of students, s.

Equation: $p = 5s + 10$

s	p
4	30
5	
6	
7	
8	

Answers

There were half as many chipmunks in the yard as there were squirrels.

Complete the table to show how the number of chipmunks, c, depends on the number of squirrels, s.

Equation: $c = s \div 2$

s	c
10	5
14	7
18	9
22	11
26	13

The store sold five pencils to each student, and ten pencils to the teacher.

Complete the table to show how the number of pencils sold, p, depends on the number of students, s.

Equation: $p = 5s + 10$

s	p
4	30
5	35
6	40
7	45
8	50
